

The LESI Young Members Congress (YMC) was created to provide opportunities and programs to assure a strong foundation for the next generation of LESI excellence. YMC is a unique networking and professional forum for young executives with developing careers in the business of intellectual property, including licensing, sale, valuation and investment

YMC demonstrates our commitment to the next generation of leaders of the IP profession, and the generation that follows! We want to engage not only up and coming intellectual property professionals but their families and children to our global community.

LESI remains a great platform for all of us to share experiences as well as socially and culturally grow through professional contact with peers from various backgrounds but united in their passion for their profession and broad world view. We realize that world of IP is not just about the business but importantly about the people we know.
